

How an IT Intelligence and Research Company Maximized It's Reach With Data Maelumat?

About The Client- Pulley Ascent (Asia) Pte Ltd

Pulley Ascent (Asia) Pte Ltd. is a Singapore-based provider of IT market intelligence and research. Technological executives and IT enterprises can use the company's technology insights, intelligence, and growth acceleration services to reduce risk, make better decisions, forecast the future, stay ahead of change, acquire a competitive advantage, and extend their reach and profitability in APAC. Its objective is to give IT professionals with detailed technological analysis, market updates, and digital transformation intelligence.

Requirement

- The client's focus is to reach all the IT decision makers and IT executives from companies of all sizes across the APAC region.
- The company wants to target new IT people while enhancing their research analysis.

Solution Offered

When the client was on lookout for the solution that addresses their data challenges, they found Data Maelumat. After reviewing us, they identified that our IT executives mailing lists can overcome their data challenges while helping them with market research. They approached us and addressed their data requirements and we offered the quick solutions:

- We helped them to build the most accurate IT Executives email list which includes contact information of IT executives from all niche industries.
- Based on their business requirements, we build customized IT executives database that offers extensive reach via email, mail and telephone.
- The database we provide was filled with complete contact details of top-level IT executives like CTO, IT Director, and other decision makers.
- Also, we included contact name, company name, contact title, mailing address, telephone numbers and verified email addresses of each contact.

Client Review

“

Very satisfied with my account manager Syed all the time. The team supports for all types of our requirement even with niche industries and always fulfill promises.

”

Angela Chen

Business Development Executive
